With its Corporate office at Udaipur and its registered office at Jaipur engaged in Mining and related business of various minerals mainly, Rock Phosphate, Lignite, Limestone, Gypsum, etc. Information has been documented and published under section 4(1) (b) of the Right to Information Act, 2005.

Chapter-I

THE PARTICULARS OF ORGANIZATION, FUNCTIONS AND DUTIES

1.1 Rajasthan State Mines and Minerals limited (in short RSMML) is one of the leading and progressive enterprises of the Government of Rajasthan. It occupies a place of pride in production and marketing of non metallic minerals in India. RSMML is multi mineral and multi location enterprise engaged in mining of Rock Phosphate, Lignite, SMS grade Limestone and Gypsum. RSMML is the leader not only in Mining & Selling of Rock Phosphate, Gypsum across the country, but also global pioneer in technology in open cast mining and mineral beneficiation of Carbonate Rock Phosphate. Besides minerals, RSMML has also forayed into Energy Sector and has setup 106.30 MW installed capacity Wind Power Project at Jaisalmer, Rajasthan.

1.2 PROFILE

THE BEGINNING & BEYOND

M/s Natural Science India (Pvt) Ltd started mining of Gypsum in the then State of Bikaner in the year 1942 on the basis of five years permit. After partition, in 1947, a long-term lease over the most prospective area at Jamsar and other areas in Bikaner were granted to M/s Natural Science. In the same year Bikaner Gypsum Limited (B G L) was registered with Natural Science as its Managing Agent for 20 years. BGL continued the mining of gypsum & its 50% production was consumed in Sindri Fertilizer Plant. Off late, BGL was appointed as the contractor for raising rock phosphate on behalf of the Govt. of Rajasthan in May 1970. In the year 1973 BGL was taken over by the Government of Rajasthan and was renamed as the Rajasthan State Mines & Minerals Limited in the year 1974 and came to be known by the abbreviation RSMML.

State Rajasthan is the biggest producer/supplier of the mineral gypsum, where surface gypsum is commercially being mined from the Western part of Rajasthan. Gypsum occurs in gypsite form and is amorphous in nature. The thickness of the bed varies from 0.45 m to about 3.0 m. The gypsum bed is normally underlain by loose sand (Younger Alluvium) of the Quaternary period. With the speedy exploitation of the surface gypsum in Rajasthan, the good quality gypsum is now available in limited areas. Sub-surface gypsum is plentifully occurring in district Nagaur; which is yet to exploit.

Gypsite & Selenite, a crystalline form of gypsum is being mined by RSMML and is one of the key producers of mineral gypsum in the state. Currently, RSMML is holding 14 nos. of Mining Leases of mineral Gypsum (minor mineral) & 3 nos. of Mining Leases of mineral Selenite (Major Mineral) in the districts Bikaner, Nagaur, Jalore & Barmer for production & sale in open market to Cement, Agriculture & Chemical sector to the tune of around 5 lakh tonne per annum. Mining of Gypsum by RSMML is considered eco-friendly activities as removing of thin surface layer of gypsum, which act as retarder/bed-rock, allows the mined out area for better cultivation/plantation & increase the productivity of land. RSMML is holding the best sub surface area under ML in district Nagaur having good quality & quantity reserves of mineral gypsum.

After the independence of India and subsequent merger of Bikaner State into the State of Rajasthan, the operations of BGL continued to flourish. Following the discovery of the Jhamarkotra Rock Phosphate deposit in Udaipur District of Rajasthan, BGL was appointed as the contractor for raising rock phosphate on behalf of the State in May 1970.

The magnitude of operations at Jhamarkotra and the need to develop the Rock Phosphate deposit rapidly on scientific lines led to the takeover of BGL by the Government of Rajasthan on 06.12.1974. The name of the Company was changed to the Rajasthan State Mines & Minerals Limited (RSMML). From 1974 to 1988, RSMML continued to work as contractors to Government for raising rock phosphate and also mined Gypsum as it had done previously. During this period, RSMML produced and marketed 6 million tones of rock phosphate and contributed more than Rs. 3000 million to the State Exchequer.

In April 1988, the Government decided to grant a lease for Rock Phosphate mining to the Company and RSMML became a full-fledged mining Company in its own right. It has not looked back since.

AMALGAMATION OF RSMDC WITH RSMML

On 20th February, 2003, the other Public Sector Undertaking in mining sector, Rajasthan State Minerals Development Corporation was merged with RSMML. The merger made the new entity a formidable force in the mining sector of India. Lignite, Gypsum and Limestone sectors received tremendous boost in terms of huge deposits and established production processes. The Company quickly resolved the issues emerged during the merger and started consolidating the mines spread in 8 districts of Rajasthan.

POST MERGER SCENARIO

Rock Phosphate continued its prime position in the business profile of the Company and catered to almost 94% of the indigenous demand during 2003-04 and 2004-05. The

capacity of industrial beneficiation plant was increased from 1500 TPD and the production got streamlined in 2004-05. The production of Lignite was streamlined at Giral and the Company is gearing up fast for providing one million tones of Lignite for the Lignite based Thermal Power plant coming up at Giral under State owned Company, Rajasthan Vidyut Utpadan Nigam Ltd. Being pioneer in the Lignite field, RSMML has ensured its strong presence in the Lignite based power sector in Rajasthan

The profit before tax for 2020-21 stood at Rs. 33.55 crore as against previous year figures of Rs. 177.23 crore. The Company started a number of R&D activities to further strengthen its R&D activities. Generous contributions were made for creation of life saving medical infrastructure in 8 project districts. The company has declared dividend of Rs. 38, 77, 57,500/- during the year 2019-20.

BUSINESS & PRODUCT PROFILE

(2) SBU & PC – LIGNITE

- At present, RSMML is operating three lignite mines under SBU & PC Lignite. The first lignite mine to commence was Giral Mine (1994) in district Barmer, followed by second lignite mine (2003) in district Nagaur as Kasnau-Matasukh Mine, which was developed for meeting demand of fuel of the Industries. Subsequently the third lignite mine i.e. Sonari, near to existing Giral mine at Barmer has also been developed (2011). The lignite mines at Barmer were primarily developed for running 2X125 MW lignite based Power Plant setup at Giral by RVUNL as per MoU signed between RSMML & RVUNL. After meeting the demand of lignite power plant, Company is undertaking e-auctions of lignite through M/s MSTC to maximize price realizations based on the demand of consuming industries. Both lignite mines at Barmer have been developed with production capacity of 10 Lac MT per annum.
- The mining activities at Kasnau-Matasukh were commenced in year 2003. However, due to presence of confined aquifer below lignite seam and keeping in control the in-rush of water in the pits, only Matasukh pit is being operated in cyclic manner. For this, while undertaking mining, depressurization of aquifer is also being done by operating required number of tube wells in the

mining pit. The other pit i.e. Kasnau is abandoned and is being utilized to store the saline water pumped from Matasukh pit alongwith the surface ponds. The production capacity at Matasukh is restricted on account of cyclic mining and based on demand of consuming industries.

- In addition to above, two other Lignite mines viz Kapurdi & Jalipa in district Barmer have also been developed under joint venture by Barmer Lignite Mining Company Ltd (BLMCL). This company is responsible for development and operation of these lignite blocks at Barmer for supply of fuel to 1080 MW Lignite based power plant being set up by M/s Raj West Power Ltd (RWPL) at Bhadresh near the mines. BLMCL has been formed as a JV Company between RSMML & RWPL as 51% & 49% partners respectively, in pursuance to the Implementation Agreement signed by GoR with RWPL to set up power project. Both mining leases have been transferred in the name of BLMCL. Around 70 Lac MT lignite is being produced every year from these mines, which is being consumed for power generation by 8 units of 135 MW each of the power plant setup by RWPL.

(3) SBU & PC- GYPSUM

- Gypsum occurs as surface deposit in western district of Rajasthan. The mining leases are in Bikaner, Barmer, Nagaur, & Jalore districts.
- Operating 14 Gypsum mines and 3 Selenite mines.
- Supplies of Gypsum powder for land reclamation
